What You Need to Know: Our American horses and burros are under siege across the country. Wild equines are being rounded up by the thousands from their rightful native lands and oftentimes shipped to destinations unknown. Domestic equines such as race horses, ponies, show horses, pet horses, quarter horses and more are disappearing in vast numbers. Where are our horses going?

About This Film: "Saving America's Horses, A Nation Betrayed" exposes the truth one of America's dirtiest little secrets. This film speaks to a broad demographic through inspirational anecdotes, riveting testimony, stunning footage and compelling solutions. You will fall in love with a courageous and proud unknown athlete; he is one of many unknown and forgotten equines that winds up in this sordid underground pipeline. The spine of the film is driven by the underdogs in this fight, those who investigate to expose the truth and those who work in the trenches every day rescuing equines of every faithful breed including America's most historic, the wild Mustang.
