Founded in 2009, the SAVING AMERICA'S HORSES Initiative is a Global Coalition founded on the powerful alliance of more than 50 of the top most influential anti-slaughter experts in the U.S., Canada and the U.K., and has grown to include members from over 50 Nations from around the world; standing together as a union of likeminded professionals, individuals, organizations, companies and grassroots groups. We strive break the cycle of animal cruelty for horses & burros through cultivating action and inspiring social change for the protection of equines from slaughter.

## Stand in Truth ~ Stand with the Horses & Burros

We invite individuals, groups, clubs, companies and organizations from all walks of life to stand united with the horses and burros by giving them a voice. This is united effort to ban the slaughter of all equines, both domesticated and wild.

We believe that

- Horses and burros are not food
- Horse slaughter is NOT humane and cannot be made humane
- Horse slaughter is driven by a perverse market of horsemeat which is riddled with fraud
- Horse slaughter is a major contributor of toxic substances and waste that contaminates the environment and places human lives at risk
- Horse slaughter supports the abuse, neglect, insidious cruelty and abandonment of equines
- State & National laws to permanently ban horse slaughter are necessary
- State & National laws permanently banning the transport of equines for slaughter are necessary
- Wild horses and burros belong free on the range
- An immediate moratorium on the roundup, removal and culling of wild equines is urgently needed
- Horse owners should have the right to humanely euthanize their equine
- Equine owners and breeders must take responsibility for the life of each equine in their charge
- Horses & burros may become homeless, but No horse or burro is "unwanted"

**Our mission to see that horse slaughter is a thing of the past.**
